

Targeted Adiposity Reduction for the Sculpted Body

REDUFAT is a groundbreaking sterile treatment solution expertly formulated for precise adiposity reduction in specific body areas. This pioneering solution artfully amalgamates the extraordinary potential of natural lipolytic, regenerative, and detoxifying extracts, ensuring awe-inspiring outcomes.

REDUFAT represents a non-invasive avenue for body sculpting and the focused reduction of localized fat, embodying a cutting-edge approach to enhancing desired results.

Science Backed Ingredients

Asiatic Spark Extract: This potent ingredient plays a pivotal role in the enhancement of the skin. It significantly increases the production of type 1 collagen and fibronectin within the cell layer. This increase in fibroblast proliferation is driven by the stimulation of cell migration from surrounding tissues and the expression or activation of growth factors. The end result is firmer, more rejuvenated skin.

Hedera Helix: Known for its decongesting and toning effects, Hedera Helix also acts as an exceptional penetrating medium. By boosting blood circulation and toning the skin, it helps to reduce oedema and leaves skin looking and feeling revitalized.

Melilotus (Sweet Clover): This extract is enriched with catechin and cinnamic acid, phenolic compounds, and coumarin. It possesses potent anti-inflammatory effects and demonstrates impressive antioxidant activities. Notably, it stimulates microcirculation and optimizes fat cell metabolism.

L-Carnitine: Serving as a physiological carrier, L-Carnitine facilitates the transport of fatty acids across the mitochondrial membrane for oxidation. This mechanism promotes the utilization of fat stores for energy.

Organic Silanol: A fundamental component of connective tissue, Organic Silanol plays a vital role in the structure of macromolecules, including elastin, collagen, proteoglycans, and glycoproteins. Additionally, it contributes to the regulation of cell metabolism, fostering an ideal environment for adiposity reduction.

Caffeine: With a direct impact on adipose cells, caffeine promotes lipolysis, inhibits phosphodiesterase, and augments cyclic AMP. This multifaceted ingredient also enhances the cutaneous microcirculation, further supporting the reduction of localized adiposity.

Artichoke Extract (Cynara Scolymus Leaf Extract): This extract stimulates lipolysis by encouraging the synthesis of coenzymes involved in anabolic processes. Additionally, it has a choleric effect, increasing bile secretion and influencing the glycogenic function of the liver.

INDICATED FOR

- Adiposity reduction
- Flaccid skin

PRESENTATION

5 vials x 10 ml, 50 mL e 1,69 fl oz.

INGREDIENTS

Asiatic Spark, Hedera Helix, Melilotus Extract, Carnitine, Caffeine, Artichoke, Organic Silanol.

APPLICATION

Apply on clean and dry skin and massage in until completely absorbed, or via virtual meso, skin needling, transdermal techniques.

FORMULATION

Sterile professional solution, WFI and osmolarity balanced.
