

Estilad[®] Biorevit 100

Biorevit 100 contains Hyaluronic Acid Cube 3[®] which includes three molecular weights of hyaluronic acid for greater penetration and increased efficacy in improving skin elasticity and skin smoothness, whilst reducing epidermal moisture loss and wrinkle depth.

Cube 3[®] helps regulate tissue repair, improving the firmness of skin and promoting more youthful looking skin.

Biorevit 100 promotes the correct mechanical protection for tissues and cell layers (corneal, endothelium, and epithelium) thanks to its high viscosity. The elasticity of the solution assists in absorbing mechanical stress and providing a protective buffer for tissues. In facilitating skin healing, it acts as a protective transport vehicle, taking peptide growth factors and other structural proteins to a site of action. It is then enzymatically degraded and active proteins are released to promote tissue repair.

Also combined in the cocktail is DMAE (Dimethylaminoethanol Tartrae) which is a precursor of the neurotransmitter, acetylcholine, which offers an instant lift to the skin.

Biorevit 100 also includes Organic Silanol which strengthens skin elasticity by inducing the synthesis of collagen and elastin whilst SNAP 8[®] and Leuphasyl[®] provide superior anti-wrinkle effects with Botulinum Toxin-like mechanism of action. They reduce the depth of facial wrinkles caused by the contraction of muscles of facial expression, especially in the forehead and around the eyes.

Biorevit 100 cocktail also contains D-panthenol (Vitamin B5) and Thiamine HCl (Vitamin B1) which aid skin moisture retention and act as antioxidants, protecting the cells from oxidative stress.

Estilad[®] Biorevit 100 is a sterile, professional treatment solution indicated for:

- Facial rejuvenation
- Fine lines and wrinkles
- Flaccid skin

CHARACTERISTICS

PRESENTATION

5 vials x 5 ml 25 ml e 0,88 fl z.

INGREDIENTS

Hyaluronic Acid Cube 3[®], DMAE, Organic Silanol, SNAP 8[®] and Leuphasyl, Panthenol, Thiamine HCl

APPLICATION

Apply on clean and dry skin and massage in until completely absorbed, or via virtual meso, skin needling, transdermal techniques.

FORMULATION

Sterile professional solution, WFI and Osmolarity Balanced.
