

Estilad[®] Biorevit Whitening

Biorevit Whitening contains advanced formula, Hyaluronic Acid Cube 3[®] which includes three molecular weights of hyaluronic acid for greater penetration and increased efficacy in improving skin elasticity and skin smoothness, whilst reducing epidermal moisture loss and the depth of fine lines and wrinkles.

Cube 3[®] helps regulate tissue repair, improving the firmness of skin and promotes more youthful looking skin.

BIOREVIT Whitening contains a number of ingredients that reduce the appearance of age spots and pigmentation by targeting the different mechanisms by which pigment is formed. Phytexcell Liquorice[®], Lightocean[®] and Glutathione are potent antioxidants that even skin tone, lighten and brighten the skin.

DMAE offers an instant lift to the skin. Randomised clinical studies show the mitigation of forehead lines and periorbital fine wrinkles, and in improving lip shape and fullness and the overall appearance of aging skin.

Organic Silanol restructures underlying tissue, providing strength, flexibility and resilience to collagen and elastin connective tissues and so tightens and tones the skin.

Snap 8[®] and Leuphasyl[®] reduce and prevent lines and wrinkles caused by muscular contraction and the antioxidant properties of Dexpanthenol and Thiamine HCl (Vitamin B1) help to fight damaging free radicals.

Estilad[®] Biorevit Whitening is a sterile, professional treatment solution indicated for:

- Age spots and pigmentation
- Aging, dull and flaccid skin
- Fine lines and wrinkles

CHARACTERISTICS

PRESENTATION

5 vials x 5 ml 25 ml e 0,88 fl z

INGREDIENTS

Hyaluronic Acid Cube3[®],
Phytexcell Liquorice[®],
Lightocean[®], Glutathione,
DMAE, Organic Silanol, SNAP 8[®],
Leuphasyl[®], Dexpanthenol,
Thiamine HCl

APPLICATION

Apply on clean and dry skin and massage in until completely absorbed, or via virtual meso, skin needling, transdermal techniques.

FORMULATION

Sterile professional solution,
WFI and Osmolarity Balanced.
