

# Estilad<sup>®</sup> Carnitine

**Carnitine is a sterile treatment solution ideal for reducing localised adiposity and cellulite affected skin which contains L-Carnitine.**

During lipolysis, triglycerides break down into two parts; glycerol and fatty acids. The fatty acids have a limited capacity to penetrate the mitochondria and need a physiological carrier to do so.

L-Carnitine is the transporter, diverting activated fatty acids towards oxidation and are therefore not used by the body to form new triglycerides.

L-Carnitine mechanism of action also improves the efficacy of other products with lipolytic effects to increase cAMP levels.

**Estilad<sup>®</sup> Carnitine** is a sterile, professional treatment solutions indicated for:

- Cellulite affected skin
- Adiposity reduction

## CHARACTERISTICS

### PRESENTATION

10 ampoules x 5 ml, 50 mL e  
1,69 fl oz.

### INGREDIENTS

L-Carnitine

### APPLICATION

Apply on clean and dry skin and massage in until completely absorbed, or via virtual meso, skin needling, transdermal techniques.

### FORMULATION

Sterile professional solution,  
WFI and Osmolarity Balanced.
