

**PROMOTING YOUNGER LOOKING SKIN**

FHACE Ultimate is a cutting-edge, sterile cosmetic solution, specially formulated for professional use. This advanced formula boasts a significant concentration of 3.2% Hyaluronic Acid (HA), containing a unique combination of 16 mg High-HA and 16 mg Low-HA in every 5 ml, which adds up to a substantial 160 mg of HA per application.

What sets FHACE Ultimate apart is its innovative use of both high molecular weight HA (ranging from 1100 to 1400 kDA) and low molecular weight HA (between 50 and 80 kDA). This ingenious combination results in HA with low density and exceptional fluidity, all without the need for cross-linking agents.

The outcome is a thermally stabilized natural HA that offers a durability comparable to low cross-linking gels but with a more natural touch.

This remarkable solution serves as a catalyst for tissue remodeling and effectively combats skin laxity in various areas, including the face, neck, and body. FHACE Ultimate's ability to stimulate tissue remodeling, coupled with its HA-rich composition, provides a significant boost in the appearance and texture of the skin, giving you a more youthful, radiant complexion. The hyaluronic acid used in this cocktail deeply hydrates the skin, promoting enhanced moisture retention and supporting overall skin health.

Whether you're looking to revitalize the face, rejuvenate the neck, FHACE Ultimate is your professional solution for achieving smoother, firmer, and more vibrant skin. Say goodbye to signs of sagging and welcome a new era of skin confidence with this innovative solution.

**INDICATED FOR**

- Facial rejuvenation
- Fine lines and wrinkles
- Flaccid skin

**PRESENTATION**

5 vials x 5 ml, 25 mL e 0,88 fl oz.

**INGREDIENTS**

Sodium Hyaluronate,  
Hyaluronic Acid Cube 3®.

**APPLICATION**

Apply on clean and dry skin and massage in until completely absorbed, or via virtual meso, skin needling, transdermal techniques.

**FORMULATION**

Sterile professional solution, WFI and osmolarity balanced.
